To whom it may concern

Silverline TV is broadcasting its program also through Amazon channels, worldwide. Due to our international activities we were and are dependent on competent international advice in various jurisdictions.

Dr. Scheele and his team of Legal Alliance could render such legal services due to their international network and knowledge.

It was and is of utmost benefit, that all of this could be delivered by only on law firm, which made it obsolete, to engage several different lawyers in different international locations – a unique experience, since it is “only” a small boutique law firm that can perform in a way, which we would normally expect from a “big player” law firm only.
